1952

3. Mar. 17.—*Mr. Salsberg*—Resolution—That in the opinion of this House the future of this Province is jeopardized by

- (1) The drift to world war which results from the failure to insist on the principle of negotiated peace and gradual and controlled disarmament;
- (2) The economic consequences of rearmament which inevitably will be economic crisis and widespread distress;
- (3) The increased domination of Ontario's resources, industries and markets by the United States of America leading to monopoly control of our natural resources by foreign interests, making the people of Ontario increasingly dependent upon the production of raw materials for United States industries, retarding the development of finished goods, manufacturing industries in Canada, and the payment of huge sums in profit to U.S. corporations.

And that the best interests of the people of this Province will be served by

- (1) A policy of negotiated peace and controlled and gradual disarmament;
- (2) The utilization of our industries and agriculture for the production of peacetime goods and the opening up of trade with all countries, and
- (3) The ownership, control and development of our industries and resources by Canadian capital, and the retention in our Province of the surpluses which accrue from the labor of the producers in industry and agriculture.

1952

3. Mar. 17.—*Mr. Salsberg*—Resolution—That in the opinion of this House the future of this Province is jeopardized by

- (1) The drift to world war which results from the failure to insist on the principle of negotiated peace and gradual and controlled disarmament;
- (2) The economic consequences of rearmament which inevitably will be economic crisis and widespread distress;
- (3) The increased domination of Ontario's resources, industries and markets by the United States of America leading to monopoly control of our natural resources by foreign interests, making the people of Ontario increasingly dependent upon the production of raw materials for United States industries, retarding the development of finished goods, manufacturing industries in Canada, and the payment of huge sums in profit to U.S. corporations.

And that the best interests of the people of this Province will be served by

- (1) A policy of negotiated peace and controlled and gradual disarmament;
- (2) The utilization of our industries and agriculture for the production of peacetime goods and the opening up of trade with all countries, and

- (1) The drift to world war which results from the failure to insist on the principle of negotiated peace and gradual and controlled disarmament;
- (2) The economic consequences of rearmament which inevitably will be economic crisis and widespread distress;
- (3) The increased domination of Ontario's resources, industries and markets by the United States of America leading to monopoly control of our natural resources by foreign interests, making the people of Ontario increasingly dependent upon the production of raw materials for United States industries, retarding the development of finished goods, manufacturing industries in Canada, and the payment of huge sums in profit to U.S. corporations.

And that the best interests of the people of this Province will be served by

- (1) A policy of negotiated peace and controlled and gradual disarmament;
- (2) The utilization of our industries and agriculture for the production of peacetime goods and the opening up of trade with all countries, and
- (3) The ownership, control and development of our industries and resources by Canadian capital, and the retention in our Province of the surpluses which accrue from the labor of the producers in industry and agriculture.

1952

3. Mar. 17.—*Mr. Salsberg*—Resolution—That in the opinion of this House the future of this Province is jeopardized by

- (1) The drift to world war which results from the failure to insist on the principle of negotiated peace and gradual and controlled disarmament;
- (2) The economic consequences of rearmament which inevitably will be economic crisis and widespread distress;
- (3) The increased domination of Ontario's resources, industries and markets by the United States of America leading to monopoly control of our natural resources by foreign interests, making the people of Ontario increasingly dependent upon the production of raw materials for United States industries, retarding the development of finished goods, manufacturing industries in Canada, and the payment of huge sums in profit to U.S. corporations.

And that the best interests of the people of this Province will be served by

- (1) A policy of negotiated peace and controlled and gradual disarmament;
- (2) The utilization of our industries and agriculture for the production of peacetime goods and the opening up of trade with all countries, and
- (3) The ownership, control and development of our industries and resources by Canadian capital, and the retention in our Province of the surpluses which accrue from the labor of the producers in industry and agriculture.

- (1) The drift to world war which results from the failure to insist on the principle of negotiated peace and gradual and controlled disarmament;
- (2) The economic consequences of rearmament which inevitably will be economic crisis and widespread distress;
- (3) The increased domination of Ontario's resources, industries and markets by the United States of America leading to monopoly control of our natural resources by foreign interests, making the people of Ontario increasingly dependent upon the production of raw materials for United States industries, retarding the development of finished goods, manufacturing industries in Canada, and the payment of huge sums in profit to U.S. corporations.

And that the best interests of the people of this Province will be served by

- (1) A policy of negotiated peace and controlled and gradual disarmament;
- (2) The utilization of our industries and agriculture for the production of peacetime goods and the opening up of trade with all countries, and
- (3) The ownership, control and development of our industries and resources by Canadian capital, and the retention in our Province of the surpluses which accrue from the labor of the producers in industry and agriculture.

 - (1) The drift to world war which results from the failure to insist on the principle of negotiated peace and gradual and controlled disarmament;
 - (2) The economic consequences of rearmament which inevitably will be economic crisis and widespread distress;
 - (3) The increased domination of Ontario's resources, industries and markets by the United States of America leading to monopoly control of our natural resources by foreign interests, making the people of Ontario increasingly dependent upon the production of raw materials for United States industries, retarding the development of finished goods, manufacturing industries in Canada, and the payment of huge sums in profit to U.S. corporations.

And that the best interests of the people of this Province will be served by

- (1) A policy of negotiated peace and controlled and gradual disarmament;
- (2) The utilization of our industries and agriculture for the production of peacetime goods and the opening up of trade with all countries, and
- (3) The ownership, control and development of our industries and resources by Canadian capital, and the retention in our Province of the surpluses which accrue from the labor of the producers in industry and agriculture.

3. “ 17.—*Mr. Salsberg*—Resolution—That in the opinion of this House the future of this Province is jeopardized by

(1) The drift to world war which results from the failure to insist on the principle of negotiated peace and gradual and controlled disarmament;

- (2) The economic consequences of rearmament which inevitably will be economic crisis and widespread distress;
- (3) The increased domination of Ontario's resources, industries and markets by the United States of America leading to monopoly control of our natural resources by foreign interests, making the people of Ontario increasingly dependent upon the production of raw materials for United States industries, retarding the development of finished goods, manufacturing industries in Canada, and the payment of huge sums in profit to U.S. corporations.

And that the best interests of the people of this Province will be served by

- (1) A policy of negotiated peace and controlled and gradual disarmament;
- (2) The utilization of our industries and agriculture for the production of peacetime goods and the opening up of trade with all countries, and
- (3) The ownership, control and development of our industries and resources by Canadian capital, and the retention in our Province of the surpluses which accrue from the labor of the producers in industry and agriculture.

3. “ 17.—*Mr. Salsberg*—Resolution—That in the opinion of this House the future of this Province is jeopardized by

- (1) The drift to world war which results from the failure to insist on the principle of negotiated peace and gradual and controlled disarmament;

- (2) The economic consequences of rearmament which inevitably will be economic crisis and widespread distress;
- (3) The increased domination of Ontario's resources, industries and markets by the United States of America leading to monopoly control of our natural resources by foreign interests, making the people of Ontario increasingly dependent upon the production of raw materials for United States industries, retarding the development of finished goods, manufacturing industries in Canada, and the payment of huge sums in profit to U.S. corporations.

And that the best interests of the people of this Province will be served by

- (1) A policy of negotiated peace and controlled and gradual disarmament;
- (2) The utilization of our industries and agriculture for the production of peacetime goods and the opening up of trade with all countries, and
- (3) The ownership, control and development of our industries and resources by Canadian capital, and the retention in our Province of the surpluses which accrue from the labor of the producers in industry and agriculture.

- (1) The drift to world war which results from the failure to insist on the principle of negotiated peace and gradual and controlled disarmament;

- (2) The economic consequences of rearmament which inevitably will be economic crisis and widespread distress;
- (3) The increased domination of Ontario's resources, industries and markets by the United States of America leading to monopoly control of our natural resources by foreign interests, making the people of Ontario increasingly dependent upon the production of raw materials for United States industries, retarding the development of finished goods, manufacturing industries in Canada, and the payment of huge sums in profit to U.S. corporations.

And that the best interests of the people of this Province will be served by

- (1) A policy of negotiated peace and controlled and gradual disarmament;
- (2) The utilization of our industries and agriculture for the production of peacetime goods and the opening up of trade with all countries, and
- (3) The ownership, control and development of our industries and resources by Canadian capital, and the retention in our Province of the surpluses which accrue from the labor of the producers in industry and agriculture.

3. “ 17.—*Mr. Salsberg*—Resolution—That in the opinion of this House the future of this Province is jeopardized by
- (1) The drift to world war which results from the failure to insist on the principle of negotiated peace and gradual and controlled disarmament;
 - (2) The economic consequences of rearmament which inevitably will be economic crisis and widespread distress;
 - (3) The increased domination of Ontario's resources, industries and markets by the United States of America leading to monopoly control of our natural resources by foreign interests, making the people of Ontario increasingly dependent upon the production of raw materials for United States industries, retarding the development of finished goods, manufacturing industries in Canada, and the payment of huge sums in profit to U.S. corporations.

And that the best interests of the people of this Province will be served by

- (1) A policy of negotiated peace and controlled and gradual disarmament;
- (2) The utilization of our industries and agriculture for the production of peacetime goods and the opening up of trade with all countries, and
- (3) The ownership, control and development of our industries and resources by Canadian capital, and the retention in our Province of the surpluses which accrue from the labor of the producers in industry and agriculture.

NOTICES OF MOTIONS

1952.

1. Feb. 22.—*Mr. Oliver*—Motion—That there be laid before this House a Return showing: the terms and conditions of all contracts, agreements, or orders for the performance of work, between The Hydro-Electric Power Commission of Ontario and the Canadian Comstock Co., Ltd.

2. Mar. 4.—*Mr. Oliver*—Resolution—That in the opinion of this House the Government should inform the Legislature as to what measures it proposes to take to combat the serious decline in farm income.

3. “ 17.—*Mr. Salsberg*—Resolution—That in the opinion of this House the future of this Province is jeopardized by
 - (1) The drift to world war which results from the failure to insist on the principle of negotiated peace and gradual and controlled disarmament;
 - (2) The economic consequences of rearmament which inevitably will be economic crisis and widespread distress;
 - (3) The increased domination of Ontario's resources, industries and markets by the United States of America leading to monopoly control of our natural resources by foreign interests, making the people of Ontario increasingly dependent upon the production of raw materials for United States industries, retarding the development of finished goods, manufacturing industries in Canada, and the payment of huge sums in profit to U.S. corporations.

And that the best interests of the people of this Province will be served by

- (1) A policy of negotiated peace and controlled and gradual disarmament;
- (2) The utilization of our industries and agriculture for the production of peacetime goods and the opening up of trade with all countries, and
- (3) The ownership, control and development of our industries and resources by Canadian capital, and the retention in our Province of the surpluses which accrue from the labor of the producers in industry and agriculture.

3. “ 17.—*Mr. Salsberg*—Resolution—That in the opinion of this House the future of this Province is jeopardized by

- (1) The drift to world war which results from the failure to insist on the principle of negotiated peace and gradual and controlled disarmament;
- (2) The economic consequences of rearmament which inevitably will be economic crisis and widespread distress;
- (3) The increased domination of Ontario's resources, industries and markets by the United States of America leading to monopoly control of our natural resources by foreign interests, making the people of Ontario increasingly dependent upon the production of raw materials for United States industries, retarding the development of finished goods, manufacturing industries in Canada, and the payment of huge sums in profit to U.S. corporations.

And that the best interests of the people of this Province will be served by

- (1) A policy of negotiated peace and controlled and gradual disarmament;
- (2) The utilization of our industries and agriculture for the production of peacetime goods and the opening up of trade with all countries, and
- (3) The ownership, control and development of our industries and resources by Canadian capital, and the retention in our Province of the surpluses which accrue from the labor of the producers in industry and agriculture.

3. “ 17.—*Mr. Salsberg*—Resolution—That in the opinion of this House the future of this Province is jeopardized by
 - (1) The drift to world war which results from the failure to insist on the principle of negotiated peace and gradual and controlled disarmament;
 - (2) The economic consequences of rearmament which inevitably will be economic crisis and widespread distress;
 - (3) The increased domination of Ontario's resources, industries and markets by the United States of America leading to monopoly control of our natural resources by foreign interests, making the people of Ontario increasingly dependent upon the production of raw materials for United States industries, retarding the development of finished goods, manufacturing industries in Canada, and the payment of huge sums in profit to U.S. corporations.

And that the best interests of the people of this Province will be served by

- (1) A policy of negotiated peace and controlled and gradual disarmament;
- (2) The utilization of our industries and agriculture for the production of peacetime goods and the opening up of trade with all countries, and

- (3) The ownership, control and development of our industries and resources by Canadian capital, and the retention in our Province of the surpluses which accrue from the labor of the producers in industry and agriculture.

3. “ 17.—*Mr. Salsberg*—Resolution—That in the opinion of this House the future of this Province is jeopardized by
 - (1) The drift to world war which results from the failure to insist on the principle of negotiated peace and gradual and controlled disarmament;
 - (2) The economic consequences of rearmament which inevitably will be economic crisis and widespread distress;
 - (3) The increased domination of Ontario's resources, industries and markets by the United States of America leading to monopoly control of our natural resources by foreign interests, making the people of Ontario increasingly dependent upon the production of raw materials for United States industries, retarding the development of finished goods, manufacturing industries in Canada, and the payment of huge sums in profit to U.S. corporations.

And that the best interests of the people of this Province will be served by

- (1) A policy of negotiated peace and controlled and gradual disarmament;
- (2) The utilization of our industries and agriculture for the production of peacetime goods and the opening up of trade with all countries, and
- (3) The ownership, control and development of our industries and resources by Canadian capital, and the retention in our Province of the surpluses which accrue from the labor of the producers in industry and agriculture.

ALEX. C. LEWIS,
Chief Election Officer.

And the House having met,

The Honourable the Lieutenant-Governor, having entered the House, took his seat on the Throne.

Mr. Welsh, the Provincial Secretary, then said:

"I am commanded by the Honourable the Lieutenant-Governor to state that he does not see fit to declare the causes of the summoning of the present Legislature of this Province until a Speaker of this House shall have been chosen according to law, but to-day at a subsequent hour His Honour will declare the causes of the calling of this Legislature"

His Honour was then pleased to retire.

And the Clerk having called for nominations for the office of Speaker, the Prime Minister, Mr. Frost, addressing himself to the Clerk, proposed to the House for their Speaker, Rev. M. Cooke Davies, Esquire, Member for the Electoral District of Windsor-Walkerville, which motion was seconded by Mr. Oliver, and it was

Resolved, That Rev. M. Cooke Davies, Esquire, do take the Chair of this House as Speaker.

The Clerk having declared the Honourable M. Cooke Davies duly elected, he was conducted by the Prime Minister and Mr. Oliver to the Dais, where, standing on the upper step, he returned his humble acknowledgement to the House for the great honour they had been pleased to confer upon him by choosing him to be their Speaker.

And thereupon he sat down in the Chair and the Mace was laid upon the Table.

The House then adjourned during pleasure.

The Honourable the Lieutenant-Governor then re-entered the House and took his seat on the Throne.

Mr. Speaker then addressed His Honour to the following effect:—

May it please Your Honour,

The Legislative Assembly have elected me as their Speaker, though I am but little able to fulfil the important duties thus assigned to me.

If, in the performance of those duties, I should at any time fall into error, I pray that the fault may be imputed to me and not to the Assembly whose servant I am, and who, through me, the better to enable them to discharge their duty to their Queen and Country, hereby claim all their undoubted rights and privileges, especially that they may have freedom of speech in their debates, access to your person at all seasonable times, and that their proceedings may receive from you the most favorable consideration.

The Provincial Secretary then said:

Mr. Speaker,

I am commanded by the Honourable the Lieutenant-Governor to declare to you that he freely confides in the duty and attachment of the Assembly to Her Majesty's person and Government, and not doubting that the proceedings will be conducted with wisdom, temperance and prudence, he grants and upon all occasions will recognize and allow the constitutional privileges.

I am commanded also to assure you that the Assembly shall have ready access to His Honour upon all suitable occasions, and that their proceedings, as well as your words and actions, will constantly receive from him the most favorable construction.

The Honourable the Lieutenant-Governor was then pleased to open the Session with the following gracious speech:

Mr. Speaker and Members of the Legislative Assembly:

As you assemble here today for the First Session of the Twenty-fourth Legislature of the Province of Ontario, we meet in an atmosphere of deep and profound sorrow that His Gracious and Well Beloved Majesty, King George the Sixth is dead. By his great courage, his unsurpassed devotion to duty, his simple dignity, his example as a husband and as a father, his fortitude in adversity and by his serenity of spirit, he has made an enduring impression upon his peoples throughout the world. Truly was he an inspiration to unity of purpose among our great commonwealth of nations. Truly was he our beloved Sovereign. In her grief, we tender to Her Majesty, Queen Elizabeth the Second, our loyalty, our devotion and our affection. It is not long since we were honoured by having her among us and we are confident that her reign will be characterized by the wise and beneficent leadership given so devotedly by her father. We pray that it may be long and happy. To Elizabeth, The Queen Mother, Queen Mary, The Princess Margaret and to other members of the Royal Family, our sympathy and commiseration are extended.

On the occasion of this Assembly, my first as Her Majesty's representative, I wish to take the opportunity of expressing my pleasure in meeting you and to extend a welcome to each one of you, especially to those who sit in this Assembly for the first time. I wish also to express my confidence that as the elected representatives of the people of this Province, you will address yourselves to your duties with diligence and with judgment.

Since the last meeting of this Assembly, the growth of our Province has continued strong and its pace has increased. The urgent and demanding requirements for national defence have been expanding. World events continue to demand the assumption by our nation of increasingly greater responsibilities for our own security and indeed for that of the free world. The conflicting influences of an inflated economy and of measures being taken to halt the trend toward a dangerous inflation are producing problems in government, great in difficulty and complicated of solution. While the Government of Ontario, by virtue of its

constitutional jurisdiction, is limited in its capacity either to control inflationary influences or to take measures which exercise direction upon the national economic structure, nevertheless it will do all in its power to maintain and preserve soundness and security within the nation.

One of the greatest needs of the people of this Province in these troubled and difficult times is for adequate housing. Very considerable progress has been made in this direction but the problem is still most acute. The capacity of our people to build and to own their own homes is not equal to the demands upon them to provide the initial financing. With credit restrictions which have increased the down payment required, there has been a slowing-up in the construction of homes. Measures will be introduced designed to stimulate in several ways the provision of more housing in the Province.

Legislation will also be introduced establishing a Crown Corporation which will qualify as an approved lending institution under the National Housing Act. The purpose of this corporation will be the provision of funds for the construction of homes in the villages, hamlets and farms throughout the Province. Recognizing the need for assistance and encouragement in expanding the agricultural development of the Province, other measures will be introduced under which young farmers may obtain assistance. A prosperous and expanding agricultural industry is essential to Ontario. It is a vital requisite for high standards of healthy living for all our people, and great strides have been taken to make farming more productive and more attractive. Research is constant in the many fields of agricultural development and will be continued unabated.

One of the influences which affects the supply of adequate housing for our people is the control of rents. The Government has continued the control of rents following the abandonment of this field by the Federal Government. New regulations have been formulated with the end in view of assuring, so far as is possible within the restricted jurisdiction of a provincial government, simplicity of operation, clarity of interpretation and intent, and fairness to both landlord and tenant. A select committee of this Legislature will be set up with authority to keep all matters involved in the control of rents, under constant examination and study.

Under the law as it stands at the present time, no one is permitted to bring an action against the Crown represented by the Province of Ontario without Her Majesty's consent, first obtained in appropriate manner. The Government proposes to abolish this requirement in certain cases and the necessary legislation will be introduced for your consideration.

Under legislation passed last year The Hydro-Electric Power Commission of Ontario was empowered to examine the rural telephone systems of the Province with a view to modernization, expansion and general improvement. Substantial progress has been made during the year and further legislation will be introduced to provide for betterment of our rural systems.

The Labour Relations Act of Ontario was designed to enable labour and management to bargain collectively and to provide an atmosphere in which differences can be composed. The conciliation services made available by the Department have operated with a great degree of success. Legislation will be

introduced which will have the effect of improving and strengthening the already highly commendable provisions of The Workmen's Compensation Act.

During the past year a special committee representative of Government, the Municipalities concerned and of the mining industry, has been studying ways and means of making more equitable, the provision of financial assistance to municipalities within the major mining areas of the Province. Proposals which are designed to establish a sound and permanent basis for assistance to our mining municipalities will be submitted for your consideration.

During the past months a committee composed of all of the interests concerned in provincial-municipal relations has been examining the many and complicated problems of this difficult field of government. The attentions of the Government are directed toward the solution of fiscal and other administrative problems of the many municipalities.

The expansion and betterment of our great highway system has been proceeding satisfactorily despite substantial shortages of the many materials required and despite the restrictions upon the construction of public works requested by the Federal Government as a measure against inflation. Motor vehicle registrations continue to increase and the necessity for expansion and improvement of our highway system is correspondingly more pressing. The campaign for safety is being pressed constantly and with vigour. Assistance to municipalities in solving their highway problems will again be given emphasis.

Many of the legislative provisions regarding the incorporation of companies have been under study with the view to improvement and modernization. The Government will introduce for your study and examination, a new and completely revised Companies Act.

With the commencement of the current calendar year, the terms of The Old Age Assistance Act, passed at a special session of the twenty-third Legislature last September, came into effect, concurrently with the commencement of universal old age pensions for Canada. Under the Ontario legislation, and complementary federal legislation, assistance upon a means test of an amount up to forty dollars each month is now being paid to our needy elder citizens between sixty-five and seventy years of age. Legislation will be submitted at this session of the Assembly for your consideration, which will carry further the provision of assistance for needy and deserving citizens of our Province. Under its terms an amount up to forty dollars per month, determined upon a means test, will be paid to persons who are totally and permanently disabled, who are between eighteen and sixty-five years of age and who are not otherwise being provided for under other pension or compensation legislation, or under other public assistance programs.

Legislation effecting clarification and extension of Mothers' Allowances, will also be introduced.

You will be asked to give your consideration to a measure ratifying and confirming an agreement entered into last December between the Governments of Canada and of Ontario under which the Province will undertake the develop-

ment of the Canadian half of the power resources in the international section of the St. Lawrence River, in conjunction with the construction of an all Canadian canal. The Hydro-Electric Power Commission of Ontario will undertake the Ontario share of the power development concurrently with an appropriate agency authorized by the United States and is ready to proceed at once with the work.

With the assistance of the best advice obtainable, the Government is progressing rapidly toward the ultimate goal of fully sustained yield from the vast resources of our forests and Crown lands. Ontario has maintained its lead in forestry reform—and there will be introduced for your study and consideration a consolidation and revision of the laws concerning Crown timber.

The conservation of our fish, game and wild life is of paramount concern and you will be asked to give careful study to proposals designed to control the taking of fish and game from aircraft, or with the use and assistance of aircraft.

Further measures having to do with the treatment of cancer will be introduced. In particular will be a bill establishing an institute of Radiotherapy designed to manage and direct the cancer centre at Wellesley Hospital in Toronto and other outside clinics. Very considerable progress has been made toward the establishment in Ontario of the finest and most modern cancer research facilities in the world. Special mention is made of the introduction of the "Cobalt Bomb" to the treatment facilities of the cancer clinic in Victoria Hospital, London. It is the intent of the Government to take all steps within its power to defeat this dreadful scourge.

A comprehensive program for the rehabilitation of prisoners confined to Ontario's penal and reformatory institutions, has been expanded and strengthened. On an experimental basis a thirty-bed clinic for the treatment of alcoholism among the prison population was opened at the Mimico Reformatory, the first of its kind in America. The results have proved most successful and it is planned to expand these facilities. Supervision by rehabilitation officers after discharge is made available to those requiring help and very good results are being experienced.

A new emphasis has been placed upon the growing importance of probation in the administration of justice, by the appointment of a Chief Probation Officer for Ontario. The function of this official will be to organize and co-ordinate the work of probation services in the juvenile and Family Courts and in the adult courts as well. The extension of probation in justifiable cases should tend to reduce the number of inmates in penal and reform institutions and generally improve the administration of justice.

Provincial grants in aid of education have again been increased during the current year. Increasing population necessarily leads to increasing costs of education and it is the view of the Government that the capacity of our people to meet these costs must be balanced most carefully with the real and essential needs. Only by so doing can our high standards be preserved. The very best of educational facilities are the heritage of the children of our people and the Government will continue to strive toward their maintenance.

Substantial progress has been made in preparations for civil defence. Ontario is the first Province in Canada, and indeed one of the first jurisdictions in the world, to take measures to standardize fire-fighting equipment. It is expected that this work will be completed during this year.

Other legislation will be introduced by the several departments for your consideration, all of which will tend to preserve and to improve the way of life of our people.

There will be presented to you a survey of the fiscal condition of the Province, together with the plans for the ensuing year. The Public Accounts for the last complete fiscal year and the Estimates for the year 1952-53 will all be submitted for your study and consideration.

By their loyal efforts and diligent application to their duties, the members of the Public Service of Ontario have earned our thanks and appreciation. By their devotion your decisions and directions are carried out. Our thanks for the years of long service given by those who have earned retirement during the past year are extended, and we remember with respect those who have died.

May I express the wish that in the interests of the people of our Province, your deliberations and decisions will be guided by Divine Providence.

His Honour was then pleased to retire.

PRAYERS.

3.40 O'CLOCK P.M.

Mr. Speaker then reported,

That, to prevent mistakes, he had obtained a copy of His Honour's Speech, which he read,

Mr. Speaker advised the House that Mr. Oliver, member for Grey South, was recognized as leader of the Opposition.

On motion by Mr. Frost, seconded by Mr. Oliver,

Ordered, That an humble address be presented to Her Most Gracious Majesty the Queen expressing the sincere sympathy of this House on the death of Her father, His Late Gracious Majesty, King George the Sixth, and also conveying to Her Majesty the assurance of the abiding loyalty of the Members of this Her Legislative Assembly of the Province of Ontario, and to these ends that the following Address be adopted:—

To The Queen's Most Excellent Majesty

MOST GRACIOUS SOVEREIGN:

Your Majesty's loyal and devoted subjects, the Members of the Legislative Assembly of the Province of Ontario, have heard with deep sorrow of the death of your beloved Father our Most Gracious King, George the Sixth, and desire to express to you, to Your Gracious Mother, and to all the Members of the Royal Family, the sincere sympathy of this Assembly and of all the people of Ontario in the great loss you have sustained.

His Late Majesty's deep sense of responsibility and His devotion to the duties of His High Office, following on His splendid services as an Officer of the Royal Navy in the First Great War, undoubtedly hastened His death and left the Empire and Commonwealth in a state of sorrow which has probably never before been experienced. His qualities as a man and a Monarch, who lived a good life and who performed a heavy task bravely and well, endeared Him to all His people throughout the World.

May we take the liberty of intruding on your great sorrow by extending our congratulations and expressing our great joy on your accession to the Throne. Your recent visit to our Province has left with us a sense of personal friendship and we feel that in you the Empire has a worthy successor to your Beloved Father. It is our fervent hope and prayer that your reign may be a long and happy one and that under your guidance the Empire and Commonwealth may enjoy an unbroken era of prosperity and peace.

On motion by Mr. Frost, seconded by Mr. Oliver,

Ordered, That the Clerk be instructed to have the Address as approved suitably inscribed and forwarded to Her Majesty through the proper channels.

The following Bill was introduced, read the first time, and ordered to be read the second time to-morrow:—

3. Mar. 17.—*Mr. Salsberg*—Resolution—That in the opinion of this House the future of this Province is jeopardized by

- (1) The drift to world war which results from the failure to insist on the principle of negotiated peace and gradual and controlled disarmament;
- (2) The economic consequences of rearmament which inevitably will be economic crisis and widespread distress;
- (3) The increase domination of Ontario's resources, industries and markets by the United States of America leading to monopoly control of our natural resources by foreign interests, making the people of Ontario increasingly dependent upon the production of raw materials for United States industries, retarding the development of finished goods, manufacturing industries in Canada, and the payment of huge sums in profit to U.S. corporations.

And that the best interests of the people of this Province will be served by

- (1) A policy of negotiated peace and controlled and gradual disarmament;
- (2) The utilization of our industries and agriculture for the production of peacetime goods and the opening up of trade with all countries, and
- (3) The ownership, control and development of our industries and resources by Canadian capital, and the retention in our Province of the surpluses which accrue from the labor of the producers in industry and agriculture.

To this Act the Royal Assent was announced by the Clerk of the Legislative Assembly in the following words:—

"The Honourable the Lieutenant-Governor of the Province doth thank Her Majesty's dutiful and loyal Subjects, accept their benevolence and assent to this Bill in Her Majesty's name."

The Honourable the Lieutenant-Governor was then pleased to deliver the following gracious speech:—

Mr. Speaker and Members of the Legislative Assembly:

It is now my duty to prorogue the first session of the Twenty-fourth Legislature of the Province of Ontario. Before so declaring I express my thanks to you in the name of Her Majesty for your attention to the business of the people of the Province. Also, before proroguing this Assembly, I wish to comment upon some particular matters to which you have applied your diligent endeavour.

Many Public Bills have been given your approval and have become law. All of these measures will bring benefit to the people of the Province. The Government has had constantly before it the duty which it owes as their servants to keep the Province in the forefront of development and expansion. Some measures have come about by reason necessarily of the gravely disturbed world conditions and the need for preserving the security of free peoples. Others, of great consequence, have resulted from the need to preserve the sound principles of our economy and with that to maintain and improve the living conditions of our people and especially to increase the assistance and encouragement provided for those who, through no fault of their own, are unable to provide fully for themselves.

I wish to mention particularly a few of these measures. Legislation has been approved under which the serious problems of adequate housing may be attacked upon several fronts. The way has been cleared for the construction of multi-family dwellings in the process of redeveloping deteriorated areas in our urban centres. Improved arrangements for the construction of rental homes jointly by Municipalities, the Province and the Federal Government have been provided, under which urban centres are enabled to make available to certain of their citizens good and satisfactory homes at a cost they are more readily able to bear. Provision has also been made which will allow and stimulate the construction and acquisition of homes in the hamlets and rural areas of the Province. This provision will bring great benefit to many of our people who are engaged in agriculture, the importance of which to our people speaks for itself.

Other legislation has been approved which will encourage our many younger farmers. Loans will be provided to enable them to establish themselves in the great industry of agriculture, thus contributing to its expansion and sound development.

Of much interest and worthy of special comment is the creation of four continuing select committees of the Assembly. One of these committees will investigate, with the widest terms of reference, the problems of lake shore erosion and Great Lakes water levels. Another will keep under constant review the administration of rent control procedures and the results flowing from that administration. A third committee will examine carefully into the framing of a completely revised Companies Act. The fourth committee will examine the election laws of the Province with a view to the recommendation of any further improvements that may be advisable.

A measure of very great importance, the first of its kind in Canada, has been brought into our law. Assistance will be provided by the Province to those of our citizens between the ages of eighteen and sixty-five who are totally and permanently disabled, and who are unable to provide adequately for themselves, or who are not otherwise provided for. This is a great forward step in caring for our deserving and needy citizens.

The need of this great Province for power will be answered in large measure by the development of the tremendous resources of the St. Lawrence River. Legislation has been passed under which The Hydro-Electric Power Commission of Ontario is authorized to undertake jointly with an appropriate authority in the United States, the development of the International Rapids section of that great river. This legislation ratifies an agreement between the Province and the Federal Government in relation to that development, and which is related as well to the construction of the St. Lawrence Seaway. It is hoped and most strongly urged that the development of that seaway will be undertaken at the earliest possible date.

Long forward steps have been taken in the improvement of provincial municipal relations. Among those steps is legislation under which the Province and its Commissions will pay to the several municipalities concerned amounts equivalent to normal municipal taxes upon the various business and administrative premises owned by the Province and by its Commissions. A further step of great importance is a measure under which the provision of financial assistance to municipalities within the major mining areas of the Province is improved and increased. The basis of this assistance is made sound and permanent.

Provision has also been made for expansion and improvement of our great highway system. Especially important are plans which are related to the improvement of highway conditions more closely connected with the traffic problems of our larger urban centres.

For the greater benefit of our people in relation to the conservation of our forests the legislation affecting forest matters has been completely revised and consolidated. Under our new Crown Timber Act provisions are made under which the ultimate goal of fully sustained yield will be brought closer by greater control of forest practices. Ontario is maintaining its lead in forestry reform.

Legislation has been approved under which, in certain cases, persons may bring action against the Crown represented by the Province of Ontario without Her Majesty's consent first obtained.

Many other measures have been passed which tend toward the betterment of our people. Progressive improvements have been provided in many fields. Among these fields are those related to the education of our children, the distribution and sale of agricultural products, the conservation of fish and game and of our other natural resources, the rehabilitation of prisoners, the administration of justice, the administration of public welfare and the improvement of public health.

Among other matters which have had your attention are those requiring the approval of Private Bills. In twenty-eight cases the proposals of those concerned have received your sanction.

Satisfactory and adequate provision for the ensuing year has been made for the financial requirements of the government. The fiscal requirements have again increased and are higher than ever before. Through careful implementation of sound policies it is, nevertheless, not necessary to impose new or increased taxation. In fact some small reductions in taxation have been possible. Increased funds are being devoted to the various fields of public welfare and of public health, as well as to the assistance of municipalities. Hospitals have received larger benefits. It is gratifying to know that the well-founded financial condition of our Province is preserved and secure.

I wish to thank you for the appropriation of public funds for these and other purposes. I am confident that under the guidance of Divine Providence, the well-being and security of the people of our Province will be strengthened. May I thank you also for your diligent and loyal services as legislators.

The Provincial Secretary then said:—

Mr. Speaker and Members of the Legislative Assembly:—

It is the will and pleasure of the Honourable the Lieutenant-Governor that that this Legislative Assembly be prorogued and this Legislative Assembly is accordingly prorogued.
